AK

PROFILE

Fourth-year Computer Science student at Mizan-Tepi University and Software Engineering Intern at Ethio Telecom. Builds modern web applications, combining clean engineering with human-centered design to turn complex requirements into simple, scalable experiences.

EXPERIENCE

Software Engineering Intern 2024 - Present
Ethio Telecom
Building internal tools and learning how reliable software supports a large, connected organization.

Computer Science Student 2022 - Present
Mizan-Tepi University
Studying the foundations behind the interfaces, systems, and products I build.

SELECTED PROJECTS

Task Management System
Team workspace for planning, assigning, and tracking work.
Next.js | NestJS | Swagger

Restaurant Management
Operations platform connecting menus, orders, staff, and daily decisions.
Next.js | TypeScript | PostgreSQL

Construction Management
Platform for managing projects, teams, materials, and site operations.
Next.js | NestJS | Prisma | PostgreSQL

Qene Bet Website
Mobile-first experience designed to simplify daily workflows and improve accessibility.
React | TypeScript | API Integration

TECHNICAL SKILLS

HTML CSS JavaScript TypeScript React Next.js NestJS Swagger Better Auth Docker Prisma PostgreSQL Git Tailwind CSS

EDUCATION

BSc. Computer Science
Mizan-Tepi University
2022 - Present | In progress

Engineering through Building
Self-directed practice
Continuous practice in product architecture, backend systems, accessible interfaces, and deployment workflows.

FOCUS

- Full-stack web development
- Product and interface design
- Reliable backend systems
- Accessible, responsive experiences
